

Modular Construction Meets ERP To Solve Challenges

Digital Building Components (DBC) brings manufacturing to the construction industry by fabricating components directly from coordinated models using digital fabrication.

DBC's multi-trade system provides quality, safety, and scheduling enhancements to construction projects, changing the way the industry builds.

DBC did not have an ERP in place and was looking for a mid-tier ERP solution that provided robust functionality with little-to-no in-flight customizations.

Microsoft Dynamics 365, combined with SIS' Construct365 Advanced Payroll and Project Cost Management solutions, met all of DBC's unique requirements.

Components**

At-a-glance:

Customer: Digital Building Components

Website: <https://www.digitalbuilding.com/>

Customer Size: About 100 Employees

Country: United States, Phoenix/Arizona

Industry: Construction

Products and Services: Microsoft Dynamics 365, Construct365 PCM & Advanced Payroll

SIS, Digital Building Components, & Microsoft Dynamics 365

Customer challenges

DBC manufactures walls and has grown so much that construction companies are using DBC to build their walls with a modular approach.

DBC had another partner implementing Microsoft Dynamics 365 but they were unable to meet the project requirements. Projects/Job Costing in standard Dynamics 365 were not as robust as hoped.

DBC came across SIS and their Construct365 Project Cost Management and Construct365 Advanced Payroll and they checked all the boxes. SIS was brought in and was able to complete the implementation, meeting all DBCs requirements.

Results

- *Project delivered on time, under budget.*
- *Improved business insight and reporting.*
- *Streamlined business processes.*
- *Accurately tracked project costs.*
- *Construction ERP functionality.*

Construction Focused Project Accounting/Job Cost functionality

Manages project budgets, revisions, change orders, subcontracts, reporting and more to give contractors much needed ease of use, with the ability to manage projects profitably.

Union & Certified Payroll integrated to Projects, 365 Payroll, HR, AP and GL.

Built to manage and process all **Union and Certified Payroll** information, all automated and simplified at the point of time entry.
