

Generation & Transmission Cooperative Supports End-to- End Processes, Growth with ERP

South Texas Electric Cooperative, Inc is a cutting-edge Generation and Transmission Cooperative and a leader in providing a diverse portfolio of affordable energy, a reliable power delivery system, and services customized to the needs of the members.

STEC Challenge

STEC has substantial Investment Projects that needed to be budgeted, managed, and Capitalized. Because they are a part of a regulated Utility, the rules and classification of Assets are complex. The solution for Projects that was configured in AX2012, prior to SIS involvement, did not meet STEC's requirements.

STEC and SIS decided the best option would be to migrate to Dynamics 365 with SIS Construct 365 PCM and Advanced Payroll modules to address known gaps in the solution.

Additional solutions were developed for complex project allocations and the ability for a single capital project to become multiple assets with different depreciation schedules.

Choosing Microsoft Dynamics 365

STEC was in the middle of a failing AX2012 implementation and needed a partner who could rescue the project and bring in IP that would close their gaps.

The SIS Construct 365 Advanced Labor Module solved their challenges by integrating timesheets and payroll processing with projects

Project functionality designed using SIS Construct365 PCM (Project Cost Management) enabled STEC to implement a manageable and simplified solution that addressed STEC's complex project accounting needs.

Leveraging Microsoft Dynamics 365 technology, SIS was able to assist STEC in completing the project on time and below budget.

At A Glance:

Employees: 500

Users: 365

Location: USA

Industry: Electric Cooperative

Products & Services: SIS Construct 365 Advanced Labor, SIS Construct 365 Project Cost Management (PCM)

Construction Focused Project Accounting/Job Cost functionality

Manages project budgets, revisions, change orders, subcontracts, reporting and more to give contractors much-needed ease of use, with the ability to manage projects profitably.

Payroll integrated to Projects, 365 Payroll, HR, AP and GL. Built to manage and process all Payroll information, all automated and simplified at the point of time entry. Construct365 Advanced Payroll has been Certified by Microsoft for Dynamics 365 and is available on Microsoft AppSource.

STEC Benefits

- ✓ Simplified budgeting capability. Improve business insight and reporting.
- ✓ Streamline business processes. Integrated payroll processing. Addressed complex, regulated cost allocation requirements.
- ✓ Supported the need for multiple capitalized assets from single project.

"Thank you to the entire SIS team for not only helping us but working together as a team to ensure we met our go-live. When we reached out to you, we were looking for a partner – and you succeeded in providing the partnership we wanted." Corporate Risk Officer – South Texas Electric Cooperative, Inc.

"When the project got tough, SIS listened & adjusted to ensure success, I felt like I could trust SIS." Corporate Risk Officer – Southwest Electric Cooperative, Inc.
